1. Basis of preparation

1.1. Reporting entity – general information

Všeobecná úverová banka, a.s. ('the Bank' or 'VUB') provides retail and commercial banking services. The Bank is domiciled in the Slovak Republic with its registered office at Mlynské nivy 1, 829 90 Bratislava 25, with the identification number (IČO) 313 20 155 and the tax identification number (DIČ) 2020411811.

The VUB Group's ultimate parent company is Intesa Sanpaolo S.p.A. ('ISP' or 'the Parent Company'), which is a joint-stock company incorporated and domiciled in Italy. The consolidated financial statements of the Company are available at the address of its registered office at Piazza San Carlo 156, 10121 Torino, Italy.

At 30 June 2026, the VUB Group operated a network of 163 points of sale (including retail branches, corporate branches, and mortgage centres) throughout Slovakia (31 December 2025: 163). The VUB Group also operated one branch in the Czech Republic (31 December 2025: 1).

At 30 June 2026, the total number of employees of the VUB Group was 3 179 (31 December 2025: 3 215). The average number of employees of the VUB Group during the year ended as at 30 June 2026 was 3 200 (31 December 2025: 3 286).

1.2. The VUB Group

The consolidated financial statements comprise the Bank and its subsidiaries (jointly referred to as 'the VUB Group' or 'the Group') and the Group's interest in associates and joint ventures. All entities are incorporated in the Slovak Republic.

	Share June 2026	Share December 2025	Main activity
Subsidiaries			
VUB Operating Leasing, a.s. ('VUB Operating Leasing')	100.00%	100.00%	Operating leasing
VUB Generali d. s. s., a.s. ('VUB Generali')	55.26%	55.26%	Pension fund administration
Joint ventures			
Monilogi, s.r.o. ('Monilogi')	33.00%	33.00%	Cash processing
Associates			
Slovak Banking Credit Bureau, s. r. o. ('SBCB')	33.33%	33.33%	Credit database administration

1.3. Basis of accounting

These condensed interim consolidated financial statements for the six months ended 30 June 2026 (hereinafter referred to as "interim financial statements") have been prepared in accordance with IAS 34 Interim Financial Reporting and are intended to update the VUB Group's latest annual financial statements prepared for the year ended 31 December 2025 (hereinafter referred to as "latest annual financial statements"). The information presented in these interim financial statements focuses on selected explanatory notes intended to inform users of these interim financial statements about events and transactions that are significant for understanding changes in the VUB Group's financial position and operating performance since the date of the latest annual financial statements and does not duplicate previously reported information. These interim financial statements do not include all disclosures required for a complete set of annual financial statements prepared in accordance with the IFRS Accounting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and adopted by the European Union ("EU"), and should therefore be interpreted together with the latest annual financial statements.

The interim financial statements have been prepared on the historical cost basis, as modified by the revaluation of:

- financial assets and financial liabilities measured at fair value through profit or loss,
- financial assets measured at fair value through other comprehensive income,
- derivatives in hedge accounting,
- buildings and land within tangible assets measured using the revaluation model at fair value,
- financial assets and financial liabilities designated as hedging instruments in fair value hedges, adjusted for changes in fair value attributable to the hedged risk.

The interim financial statements have been prepared on a going concern basis, assuming that the VUB Group will continue its operations in the foreseeable future.

1.4. Functional and presentation currency

EUR is the functional and presentation currency of the VUB Group. The financial statements are presented in thousands of EUR ('€' or 'EUR'), unless indicated otherwise. Negative balances are presented in brackets.

2. Changes in accounting policies

The accounting policies applied in these interim financial statements have been consistently applied with those applied in the latest annual financial statements of the VUB Group for the year ended 31 December 2025.

Except for the changes below, the VUB Group has consistently applied the accounting policies as set out in note 3 to all periods presented in the financial statements.

2.1. Standards and interpretations relevant to the VUB Group's operations issued that are effective for the current year and have been endorsed by the European Union

Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)

In May 2024, the IASB issued Amendments to the classification and Measurement of Financial Instruments which amended IFRS 9 and IFRS 7.

The requirements will be effective for annual reporting periods beginning on or after 1 January 2026, with early application permitted, and relate to:

- Settling financial liabilities using electronic payments system; and
- Assessing contractual cash flow characteristics of financial assets, including those with sustainability-linked features.

The VUB Group has performed an assessment of all material electronic payment systems used. Most of the used electronic settlement systems result in real-time settlement.

There is a number of electronic settlement systems used by the VUB Group that do not result in real-time settlement. In such cases, the financial liability and the associated cash are derecognised at the point when the payment has reached the beneficiary, which is when the obligation is discharged. The amendments are not expected to have a material impact.

In addition, the Bank has assessed the impact of the Amendments on its financial assets that sustainability-linked features and other similar contingent features, as well as on non-recourse financing and contractually linked instruments. Based on the assessments performed, the amendments in these areas are not expected to have a material impact on the financial statements.

2.2. Standards and interpretations issued but not yet effective or not early adopted by the VUB Group

A few new standards and amendments to standards are not yet effective or not yet adopted by the European Union. Early adoption is permitted; however, the VUB Group has not adopted the new and amended standards in preparing these consolidated financial statements. The VUB Group intends to adopt these standards when they become effective.

IFRS 18 Presentation and Disclosures in Financial Statements

IFRS 18 will replace IAS 1 Presentation of Financial Statements and applies for annual reporting periods beginning on or after 1 January 2027.

The new standard introduces the following key new requirements:

- The VUB Group is required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. The VUB Group is also required to present a newly defined operating profit subtotal. The VUB Group 's net profit will not change.
- Management-defined performance measures ('MPMs') are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

The VUB Group is currently working to identify the impacts the standard will have on the primary financial statements and notes to the financial statements. The VUB Group considers its main business activities to include the provision of financing to customers and investing in financial assets. In accordance with IFRS 18, some of the income and expenses related to those activities are classified in the operating category, as an exception to the general requirements that would otherwise have resulted in their classification in the investing or financing categories.

The initial expected impacts of IFRS 18 on the VUB Group’s financial statements are, as follows:

– Income and expenses from the following will be classified in the operating category within the statement of profit or loss: cash and cash equivalents; liabilities from transactions that involve only the raising of finance; generally, assets invested in as part of the VUB Group’s main business activity of investing in financial assets that generate a return individually and largely independently of the VUB Group’s other resources.
– Foreign exchange differences will be classified in the same category as the related income and expense giving rising to the foreign exchange difference, with some exceptions.
– Gains and losses on hedging instruments, including those not designated as such, but used to manage exposure to identified risks, will be classified in the same category as the income and expenses relating to the risk being covered, with some exceptions.
– For the statement of cash flows, the ‘operating profit’ subtotal will be used as the starting point for determining cash flows from operating activities. Furthermore, the classification of the total cash flows from all dividends received, all interest paid, and all interest received will each, respectively, be classified in a single category in the statement of cash flows following the classification of the related income and expenses in the statement of profit or loss.
– New disclosures will be added for management-defined performance measures;
– A reconciliation for each line item in the statement of profit or loss between the restated amounts presented applying IFRS 18, and the amounts previously presented applying IAS 1.

The VUB Group is also assessing the impact on how information is grouped in the financial statements, including for items currently labelled as 'other'.

The following new and amended standards are not expected to have a significant impact on the financial statements:

– Contracts Referencing Nature-dependent Electricity (Amendments to IFRS 9 and IFRS 7);
– Annual Improvements to IFRS Accounting Standards (Volume 11);
– IFRS 19 Subsidiaries without Public Accountability: Disclosures;
– Translation to a Hyperinflationary Presentation Currency (Amendments to IAS 21);
– Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendment in IFRS 10 and IAS 28).

3. Material accounting policies

3.1. Fair value measurement

'Fair value' is the price that would be received for the sale of an asset or paid for the transfer of a liability in an orderly transaction between market participants at the measurement date in the principal on the main market, or if such a market does not exist, the most advantageous market to which the VUB Group has access at that date. The fair value of a liability reflects its non-performance risk.

When one is available, the VUB Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the VUB Group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction. The hierarchy of valuation techniques is explained in note 5.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price, i.e. the fair value of the consideration given or received.

If the VUB Group determines that the fair value on initial recognition differs from the transaction price, and the fair value is neither evidenced by a quoted price in an active market for an identical asset or liability, nor based on a valuation technique for which any unobservable inputs are judged insignificant for measurement, then the financial instrument is initially measured at fair value according to the model, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognized in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is fully supported by observable market data or when the transaction is closed out.

3.2. Current and deferred income tax, special levy and other taxes

Income tax is calculated in accordance with the regulations of the Slovak Republic and other jurisdictions in which the VUB Group operates.

Income tax expense is recognized at each time interval during the accounting year based on the best estimate of the weighted average annual income tax rate expected for the entire accounting year. In the event of a change in the estimate of the annual income tax rate, the accrued amount of income tax costs for one of the periods during the accounting year may be adjusted in the subsequent period of that accounting year.

With effect from January 2024, a new type of special levy for the banking sector came into force in Slovakia. For the year 2026, the amount of the special levy is set at 20.04% of the profit before tax, and it will decrease to 15% in 2027. From 2028, banks will be subject to the standard rate of the special levy on business in regulated sectors. The special levy for regulated entities is a tax-deductible expense.

Deferred income tax assets and liabilities are recognized, using the balance sheet method, for all temporary differences arising between the carrying amounts of assets and liabilities and their tax bases. Expected tax rates, applicable for the periods when assets and liabilities are realised, are used to determine deferred tax.

The VUB Group is also subject to various indirect operating taxes, which are included in 'Other operating expenses'.

4. Financial and operational risk management

4.1. Credit risk

4.1.1. Impairment losses

Financial assets exposed to credit risk, broken down by institutional sector based on the ESA 2010 methodology:

	June 2026			December 2025		
€ '000	Gross amount	Impairment losses	Net amount	Gross amount	Impairment losses	Net amount
Financial assets at AC						
Due from banks	190 398	(2 998)	187 400	219 786	(6 711)	213 075
Due from customers						
Financial corporations	1 200 211	(430)	1 199 781	1 141 417	(3 143)	1 138 274
Non-financial corporations	6 900 436	(123 146)	6 777 290	6 925 253	(147 064)	6 778 189
Retail	12 742 350	(210 494)	12 531 856	12 127 781	(207 747)	11 920 034

Loan commitments and financial guarantees	15 727	(11)	15 716	1 491	(871)	620

4.1.4. Write-off Policy

The amount of loans written-off during the year that are still subject to enforcement activity is EUR 5 685 thousand (30 June 2025: EUR 20 406 thousand).

4.1.5. Offsetting financial assets and financial liabilities

Offsetting financial assets and financial liabilities relates to financial assets and financial liabilities that are:

- Offset in the statement of financial position; or
- Subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments, irrespective of whether they are offset in the statement of financial position.

In general, the similar agreements include derivative clearing agreements, global master repurchase agreements, and global master securities lending agreements. Similar financial instruments include derivatives, sales and repurchase agreements, reverse sale and repurchase agreements, and securities borrowing and lending agreements. Financial instruments such as loans and deposits are not disclosed in the tables below unless they are offset in the statement of financial position.

The ISDA and similar master netting arrangements do not meet the criteria for offsetting in the statement of financial position. This is because they create for the parties to the agreement a right of set-off of recognized amounts that is enforceable only following an event of default, insolvency or bankruptcy of the VUB Group or the counterparties or following other predetermined events. In addition, the VUB Group and its counterparties do not intend to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

The VUB Group receives and gives collateral in the form of cash and marketable securities in respect of the following transactions:

- Derivatives,
- Security financing transaction instruments.

Such collateral is subject to standard industry terms including, when appropriate, an ISDA/Credit Support Annex (CSA) and Global Master Repurchase Agreement ('GMRA'). This means that securities received or given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each party the right to terminate the related transactions on the counterparty's failure to post collateral.

4.1.6. Internal and external ratings

The following table shows the quality of the VUB Group's credit portfolio in terms of internal ratings:

5. Estimated fair value of financial assets and financial liabilities

See accounting policy in note 3.1.

The VUB Group applies the following fair value hierarchy, which categorizes the inputs to valuation techniques used to measure fair value into three levels:

Level 1: inputs represented by quoted prices (unadjusted) in active markets for identical assets or liabilities accessible by the VUB Group as at the measurement date;

Level 2: inputs other than quoted prices included in Level 1 that are directly or indirectly observable for the assets or liabilities to be measured; and

Level 3: inputs unobservable for the asset or liability.

The highest priority is given to effective market quotes (level 1) for the valuation of assets and liabilities or for similar assets and liabilities measured using valuation techniques based on market-observable parameters other than financial instruments quotes (level 2) and the lowest priority to unobservable inputs (level 3). Following this hierarchy, where available, fair value estimates made by the VUB Group are based on quoted market prices. However, no readily available market prices exist for a significant portion of the VUB Group's financial instruments. In circumstances where the quoted market prices are not readily available, fair value is estimated using discounted cash flow models or other pricing models as appropriate.

Under level 2, the principal valuation technique used by the VUB Group for debt instruments involves the method of discounting future cash flows. The calculation takes into account the time value of money (risk free rate of interest) and the credit risk expressed in the form of credit spreads applied to the bonds' yield and representing the risk premium the investor claims against a risk-free investment. In the case of derivative financial instruments, the VUB Group uses standard fair value calculation models based on the principal net present value using the yield curve to discount all future cash flows from derivatives for all relevant currencies. The principal input parameters used by the models comprise interest rate curves, volatility curves, spot and forward prices and the correlation between underlying assets. Changes in underlying assumptions, including discount rates and estimated future cash flows, affect the estimates significantly. The VUB Group also considers its own and counterparty's credit risk.

The valuation technique defined for a financial instrument is adopted over time and is modified only following significant changes in market conditions or the subjective conditions related to the issuer of the financial instrument. The VUB Group monitors the occurrence of these changes and accordingly reassesses the classification into the fair value hierarchy. For determining the timing of the transfers between the levels, the VUB Group uses the end of the reporting period as the day when the transfer is deemed to have occurred.

In estimating the fair value of the VUB Group's financial instruments, the following methods and assumptions were used:

Cash and cash equivalents

The carrying values of cash and cash equivalents are deemed to approximate their fair value.

Due from banks

The fair value of due from banks balances with maturities more than one year is estimated using discounted cash flow analyses, based upon the risk-free interest rate curve. For maturities up to one year and not significant balances, the carrying amounts of amounts due from banks approximate their fair value.

Due from customers

The fair value of loans and advances to customers is estimated using discounted cash flow analyses, based on the risk-free interest rate curve and risk reflecting creditworthiness of the counterparty. Impairment losses are taken into consideration when calculating fair values.

Purchased debt securities

The carrying values of cash and cash equivalents are deemed to approximate their fair value.

Due to banks

The carrying amounts of due to banks approximates their fair value. The fair value of due to banks is estimated by discounting their future expected cash flows using relevant discount interest rate curve.

Debt securities in issue

The fair value of debt securities issued by the VUB Group is based on quoted market prices. Where no market prices are available, the fair value was calculated by discounting future cash flows using the risk-free interest rate curve

adjusted by credit spreads reflecting the credit quality of VUB as the issuer.

There were no transfers of financial instruments among the levels during 2026 and 2025.

6. Segment reporting

The VUB Group reports financial and descriptive information about its operating segments in the financial statements. An operating segment is a component of the VUB Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the VUB Group), whose operating results are regularly reviewed by the VUB Group's management to make decisions about resources to be allocated to the segment and to assess its performance, and for which separate financial information is available.

The VUB Group operates in three operating segments: Retail Banking, Corporate Banking and Central Treasury. Each segment is exposed to different risks and differs in the nature of its services, business processes and types of customers for its products and services.

For all segments the VUB Group reports a measure of segment assets along with liabilities and income and expense items, a reconciliation of total reportable segment revenues, total profit or loss, total assets, liabilities and other amounts disclosed for reportable segments to corresponding amounts in the VUB Group's financial statements.

Most of the transactions of the VUB Group are related to the Slovak market. However, the group operates also on the Czech market via a foreign subsidiary in Prague performing activities especially in corporate banking and Central Treasury.

Operating segments pay and receive interest to and from the Central Treasury on an arm's length basis in order to reflect the costs of funding.

Retail Banking includes loans, deposits and other transactions and balances with households, sole traders and small business segment.

Corporate Banking comprises SME, the Corporate Customer Desk ('CCD'), Municipalities and Public Sector Entities. SME includes complex loan structures, deposits and other transactions and balances with SME (company revenue up to EUR 50 million; if revenue information is not available, bank account turnover is used). The CCD includes complex loan structures, deposits and other transactions and balances with large corporate customers (company revenue over EUR 50 million).

Central Treasury ensures the VUB Group's funding, the issuance of debt securities as well as transactions related to the trading book.

The VUB Group reported in the column Other a Central Governance Centre that manages the VUB Group's premises, equity investments and own equity funds as well as Risk Management that operates the workout loan portfolio. Unclassified items are also reported within this column.

9.1. Cash flow hedge related to foreign currency risk

At 30 June 2026 the VUB Group used one currency forward to hedge the currency risk of an expected future transaction when transferring the economic result of branch Prague in the amount of CZK 152 504 thousand (at 31 December 2025 three currency forwards in the amount of CZK 527 439 thousand). The maturity of this hedging instrument is 14 January 2027. Due to the nature of the business, hedging inefficiency is not expected.

* Interest rate risk hedging of covered bonds is sometimes closed before the original maturity of the interest rate swap. This is due to the fact that the interest rate risk position of the VUB Group changed in a way that required more fixed-rate liabilities. Since the originally fixed-rate covered bonds were in the past swapped into floating rate, these swaps were early terminated in order to achieve the required interest risk position of the VUB Group.

22.1. Regulatory capital management

The primary objectives of the VUB Group's capital management are to ensure that the VUB Group complies with externally imposed capital requirements and that the VUB Group maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholders' value.

The VUB Group manages its capital structure and adjusts it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the VUB Group may adjust the amount of dividend payment to shareholders, return capital to shareholders, issue capital securities or other capital instruments, classified as Additional Tier 1, or Tier 2. No changes have been made in the objectives, policies and processes since the previous year.

The VUB Group's regulatory capital position was determined based on the rules for capital adequacy calculation set by the CRR Regulation:

€ '000	June 2026	December 2025
Tier 1 capital		
Share capital	510 819	510 819
Share premium	13 719	13 719

23. Off-balance sheet items

23.1. Issued guarantees and commitments and undrawn credit facilities

€ '000	June 2026	December 2025
Issued guarantees	1 207 827	1 184 736
Commitments and undrawn credit facilities	5 257 207	4 640 565
of which revocable	*1 684 449*	*1 399 123*
	6 465 034	5 825 301

Issued guarantees represent irrevocable assurances that the VUB Group will make payments in the event that a borrower cannot meet its obligations to third parties. These assurances carry the same credit risk as loans and therefore the VUB Group recognises provisions for these instruments (note 19).

The primary purpose of commitments to extend credit is to ensure that funds are available to the customer as required. Commitments and undrawn credit facilities represent undrawn portions of commitments, credit facilities and approved overdraft loans.

23.2. Legal proceedings

In the normal course of business, the VUB Group is subject to a variety of legal actions. The VUB Group conducted a review of legal proceedings outstanding against it as of 30 June 2026. Pursuant to this review, management has recorded total provisions of EUR 6 976 thousand (31 December 2025: EUR 6 885 thousand) in respect of such legal proceedings (note 19). The VUB Group will continue to defend its position in respect of each of these legal proceedings.

In addition to the legal proceedings covered by provisions, there are contingent liabilities arising from legal proceedings in the total amount of EUR 30 200 thousand, as at 30 June 2026 (31 December 2025: EUR 26 800 thousand). This amount represents existing legal proceedings against the VUB Group that will most probably not result in any payments due by the VUB Group.
